**Palm Beach County, FL**—Florida Department of Health Palm Beach County has **CANCELLED the HEALTH ADVISORY for Jupiter Beach Park and Palm Beach** after recent sampling showed bacterial levels in the water have returned to the **GOOD** range of less than 35 colonies **per 100 milliliters** of marine water. Carlin Park and Lake Worth beaches, closed earlier in the week due to high surf, also sampled in the good range..

Causes of the elevated level that prompted the advisory are unknown but are generally associated with wildlife, heavy recreational usage, **high surf from high winds and high tides** or runoff following heavy rains. The DOH-Palm Beach always encourages rinsing with fresh water after swimming in any natural body of water.

Health department staff samples the beach waters at 13 locations from Boca Raton to Jupiter for enterococci as recommended by the Florida Department of Environmental Protection and the EPA. The samples are laboratory tested for concentrations and a value assigned to indicate poor, moderate or good ranges.

Beach water quality for Palm Beach County and throughout the state can be found at [www.flhealthpalmbeach.org](http://www.flhealthpalmbeach.org) and click on “beach water quality”.

---

---

\*A Poor rating may result in a resampling event to confirm poor conditions; otherwise a Health Advisory will be issued immediately. These indicate that contact with the water at this site may pose increased risk of infectious disease, particularly for susceptible individuals

**Beach Action Values (BAV) Enterococcus Results Description**

Date of Sample 3-5-2018 **resample 3-7-18**

Site	Name	City	Enterococci	Water Quality	Status
1	Dubois Park	Jupiter	50	Moderate	Satisfactory
<b>2</b>	<b>Jupiter Beach Park</b>	<b>Jupiter</b>	<b>240/20</b>	<b>GOOD</b>	<b>Satisfactory</b>
