

HIV Surveillance Monthly Reports

Please Note: “Current HIV Infection data by year of report reflects any case meeting the CDC definition of ‘HIV infection’ which includes all newly reported HIV cases and newly reported AIDS cases with no previous report of HIV in Florida. If a case is later identified as being previously diagnosed and reported from another state, the case will no longer be reflected as a Florida case and the data will be adjusted accordingly. **Data from the most recent calendar year (2016) are considered provisional and therefore should not be used to confirm or rule out an increase in newly diagnosed cases in Florida.** The final year-end numbers are generated in July of the following year, after duplicate cases are removed from the dataset, as is customary of HIV surveillance in the US. “

Psyche H. Doe

HIV Surveillance Program Manager
Florida Health- Palm Beach County
1050 West 15th Street
2nd Floor, Room 18
Riviera Beach, FL 33404
(561) 840-3137 (office)
(561) 402-9773 (cell)

Mission: To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Reportable Diseases/Conditions in Florida

Practitioner List (Laboratory Requirements Differ)

Effective June 4, 2014

Did you know that you are required* to report certain diseases to your local county health department?

- ! Report immediately 24/7 by phone upon initial suspicion or laboratory test order
- ☎ Report immediately 24/7 by phone
 - Report next business day
 - + Other reporting timeframe

Birth Defects

- + Congenital anomalies
- + Neonatal abstinence syndrome (NAS)

Cancer

- + Cancer, excluding non-melanoma skin cancer and including benign and borderline intracranial and CNS tumors

HIV/AIDS

- + Acquired immune deficiency syndrome (AIDS)
- + Human immunodeficiency virus (HIV) infection
 - HIV, exposed infants <18 months old born to an HIV-infected woman

STDs

- Chancroid
- Chlamydia
- Conjunctivitis in neonates <14 days old
- Gonorrhea
- Granuloma inguinale
- Herpes simplex virus (HSV) in infants <60 days old with disseminated infection and liver involvement; encephalitis; and infections limited to skin, eyes, and mouth; anogenital HSV in children <12 years old
- Human papillomavirus (HPV), associated laryngeal papillomas or recurrent respiratory papillomatosis in children <6 years old; anogenital papillomas in children <12 years old
- Lymphogranuloma venereum (LGV)
- Syphilis
- ☎ Syphilis in pregnant women and neonates

Tuberculosis

- Tuberculosis (TB)

All Others

- ! Outbreaks of any disease, any case, cluster of cases, or exposure to an infectious or non-infectious disease, condition, or agent found in the general community or any defined setting (e.g., hospital, school, other institution) not listed that is of urgent public health significance

☎ Amebic encephalitis

! Anthrax

- Arsenic poisoning
- Arboviral diseases not otherwise listed

! Botulism, foodborne, wound, and unspiced

- Botulism, infant

! Brucellosis

- California serogroup virus disease
- Campylobacteriosis
- Carbon monoxide poisoning
- Chikungunya fever

☎ Chikungunya fever, locally acquired

! Cholera (*Vibrio cholerae* type O1)

- Ciguatera fish poisoning
- Creutzfeldt-Jakob disease (CJD)
- Cryptosporidiosis
- Cyclosporiasis
- Dengue fever

☎ Dengue fever, locally acquired

! Diphtheria

- Eastern equine encephalitis
- Ehrlichiosis/anaplasmosis
- *Escherichia coli* infection, Shiga toxin-producing
- Giardiasis, acute

! Glanders

! *Haemophilus influenzae* invasive disease in children <5 years old

- Hansen's disease (leprosy)

☎ Hantavirus infection

☎ Hemolytic uremic syndrome (HUS)

☎ Hepatitis A

- Hepatitis B, C, D, E, and G
- Hepatitis B surface antigen in pregnant women or children <2 years old

☎ Herpes B virus, possible exposure

! Influenza A, novel or pandemic strains

☎ Influenza-associated pediatric mortality in children <18 years old

- Lead poisoning
- Legionellosis
- Leptospirosis

☎ Listeriosis

- Lyme disease
- Malaria

! Measles (rubeola)

! Melioidosis

- Meningitis, bacterial or mycotic

! Meningococcal disease

- Mercury poisoning

- Mumps

☎ Neurotoxic shellfish poisoning

☎ Pertussis

- Pesticide-related illness and injury, acute

! Plague

! Poliomyelitis

- Psittacosis (ornithosis)
- Q Fever

☎ Rabies, animal or human

! Rabies, possible exposure

! Ricin toxin poisoning

- Rocky Mountain spotted fever and other spotted fever rickettsioses

! Rubella

- St. Louis encephalitis

- Salmonellosis

- Saxitoxin poisoning (paralytic shellfish poisoning)

! Severe acute respiratory disease syndrome associated with coronavirus infection

- Shigellosis

! Smallpox

☎ Staphylococcal enterotoxin B poisoning

☎ *Staphylococcus aureus* infection, intermediate or full resistance to vancomycin (VISA, VRSA)

- *Streptococcus pneumoniae* invasive disease in children <6 years old

- Tetanus

- Trichinellosis (trichinosis)

! Tularemia

☎ Typhoid fever (*Salmonella* serotype Typhi)

! Typhus fever, epidemic

! Vaccinia disease

- Varicella (chickenpox)

! Venezuelan equine encephalitis

- Vibriosis (infections of *Vibrio* species and closely related organisms, excluding *Vibrio cholerae* type O1)

! Viral hemorrhagic fevers

- West Nile virus disease

! Yellow fever

*Section 381.0031 (2), *Florida Statutes* (F.S.), provides that "Any practitioner licensed in this state to practice medicine, osteopathic medicine, chiropractic medicine, naturopathy, or veterinary medicine; any hospital licensed under part I of chapter 395; or any laboratory licensed under chapter 483 that diagnoses or suspects the existence of a disease of public health significance shall immediately report the fact to the Department of Health." Florida's county health departments serve as the Department's representative in this reporting requirement. Furthermore, Section 381.0031 (4), F.S. provides that "The department shall periodically issue a list of infectious or noninfectious diseases determined by it to be a threat to public health and therefore of significance to public health and shall furnish a copy of the list to the practitioners..."

HIV data includes those cases that have converted to AIDS. These HIV cases cannot be added with AIDS cases to get combined totals since the categories are not mutually exclusive.

Data Source: FL DOH, Bureau of Communicable Diseases, HIV/AIDS and Hepatitis Section, data as of July 31, 2016.

Note: Data are for persons >13 years of age for all categories. This data does not include Department of Corrections cases.

*Other includes all races not listed above. **There is not sufficient data to report transgender.
